

FAHEEMA TAMTON

AI / Machine Learning Engineer

+91 7902912307 | faheemataamton@gmail.com | Kannur, Kerala | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [AI Blogs](#)

PROFESSIONAL SUMMARY

AI/ML Engineer with experience designing, training, testing, and deploying intelligent systems using Machine Learning, Deep Learning, Computer Vision and NLP. Skilled in building scalable AI solutions with Generative AI, Agentic AI, LLMs, VLMs, OCR, RAG, TensorFlow, PyTorch, and Python for real-world applications and automation.

TECHNICAL SKILLS

- **Programming & Development:** Python, Django, Yolo, Scikit Learn, Git/GitHub, VS Code, PyCharm, Jupyter Notebook, Google Colab, Anaconda
- **Machine Learning & AI:** Supervised Unsupervised Learning, Neural Networks (CNNs, RNNs, Transformers), Gen AI, Agentic AI, Feature Engineering, Model Fine-Tuning, Prompt Engineering, LLM Integration (Gemini, OpenAI API)
- **Computer Vision NLP:** OpenCV, OCR Pipelines, Object Detection, Image Processing, Natural Language Processing, NLTK, spaCy
- **Frameworks & Libraries:** TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Flask, FastAPI, Matplotlib, Seaborn
- **Data Engineering & Analytics:** Data Preprocessing, ETL Pipelines, Data Visualization, RESTful API Design, Structured Data Extraction
- **Deployment & Tools:** Roboflow, Kaggle, Git/GitHub, Google Colab, Inference Optimization, Docker

AI / ML PROJECTS

Easy Heal — Full-Stack AI Web Application — AI, Qwen2 VL, VLM, LM Studio, DL, CV [GitHub](#) [LinkedIn](#)

- Developed an AI-powered prescription understanding system using Vision-Language Models (VLMs), multimodal inference, and NLP-based medical entity extraction from handwritten prescriptions.
- Built a Django-based healthcare automation system for intelligent medicine scheduling, real-time reminders, and patient medication tracking.

InMyPDF — Agentic Multimodal RAG System — Python, FastAPI, RAG, FAISS, LangChain, OpenAI [GitHub](#) [LinkedIn](#)

- Developed an Agentic Retrieval-Augmented Generation (RAG) system for intelligent PDF question answering using FastAPI, LangChain, FAISS, and OpenAI LLMs.
- Built a multimodal ingestion pipeline supporting text, tables, and OCR-based image extraction with semantic chunking, vector embeddings, and context-aware retrieval.
- Implemented FAISS-powered semantic search and grounded LLM response generation to improve retrieval accuracy and reduce hallucinations in document-based querying.

SoulMirror — ML, Scikit-learn, Random Forest, Python, Flask [GitHub](#) [LinkedIn](#)

- Developed an AI-powered MBTI personality prediction platform using Flask and Machine Learning to classify users into 16 personality types from behavioral questionnaire responses.
- Built an NLP and Random Forest-based prediction pipeline with preprocessing, feature engineering, and classification for accurate personality inference.

Medicine Blister Text Extraction — Apollo Pharmacy — VLMs, PaddleOCR, EasyOCR, Roboflow

- Developed an AI-driven document intelligence pipeline for extracting and validating medicine blister text with automated expiry date recognition using OCR and Vision-Language Models.
- Conducted VLM vs OCR performance evaluation and handled dataset annotation, preprocessing, and optimisation workflows using Roboflow.

Object Detection for Semi-Humanoid Robots — I HUB Research & Robotics Pvt. Ltd. — Roboflow

- Handled and preprocessed large-scale image datasets, including annotation and data augmentation, and implemented YOLO-based object detection to enable accurate multi-object recognition while optimizing data pipelines, training workflows, and inference performance for semi-humanoid robotic vision systems.
- Achieved 80% mAP with inference time of 420 ms per image.

PROFESSIONAL EXPERIENCE

AI / ML Engineer Intern | I HUB Research & Robotics Private Limited

Sep 2024 – Mar 2026

- Worked in a team of 3 members on AI/ML and computer vision projects for real-world applications.
- Handled large-scale datasets (25000+ images), including annotation, preprocessing, and augmentation.
- Collaborated on production-level systems involving OCR, object detection, and data pipelines.
- Developed real-time computer vision solutions for semi-humanoid robotics using YOLO; including dataset preparation, model training, performance evaluation, and optimisation for deployment-ready inference.

Python Intern | Kiwisoft Solutions LLP

Oct 2024 – Mar 2025

- Developed full-stack web applications using Python, designing RESTful APIs, implementing authentication, managing databases, and integrating UPI-based payment systems.

EDUCATION

Post Graduate Diploma in Artificial Intelligence & Machine Learning — I Hub School of Learning

Jun 2025 – Mar 2026

Bachelor of Science in Computer Science — Kannur University, Kerala

Jun 2022 – Mar 2025
